

# Beacon Wind Survey Update

## February 2021

**Equinor Wind US** continues planning the Beacon Wind project in BOEM lease area OCSA-0520. Beacon Wind is planned for an area of 128,000 acres in federal waters approximately 60 miles east of Montauk Point and 20 miles south of Nantucket. Beacon Wind will provide renewable power to over a million households in the Northeast.

The ROV and towed seismic geophysical survey has been ongoing by MMT on behalf of **Equinor US** using survey vessel Stril Explorer since 9th August 2020. During this survey the vessel has been and will continue to be deploying ROV subsea survey equipment along with other towed equipment which will restrict its ability to manoeuvre. Approaching vessels are requested to pass at a safe speed and distance.

### Project Description:

The Geophysical survey area **covers the planned Beacon Wind lease area and Export Transmission Route.**

Mariners are advised to keep a safety clearance to the vessel of no less than 400 yards. Stril Explorer will continue to operate from the Provport, RI until April 2021.

Vessel: STRIL EXPLORER  
Call sign: LAZT7  
IMO: 9484845  
Owner: Mokster
