

Equinor Wind US

Beacon Wind Sea Floor Sampling Survey Update

May 3, 2022

Attention Fishermen

Beacon Wind's geotechnical site investigations conducted by Geoquip Marine's MV Dina Polaris lost her seabed frame (SBF) on April 24th 2022 while conducting geotechnical surveys in the Beacon Wind lease area. The SBF was lowered through the vessel moonpool into the water column. Failure of the load-bearing winch wire caused the SBF to drop through the water column to the sea floor. Geoquip has safety and entanglement concerns regarding marking the SBF with a buoy and has received USCG approval for Geoquip to leave the SBF without any markings. USCG has issued a Notice to Mariners of the obstacle.

SBF Details:

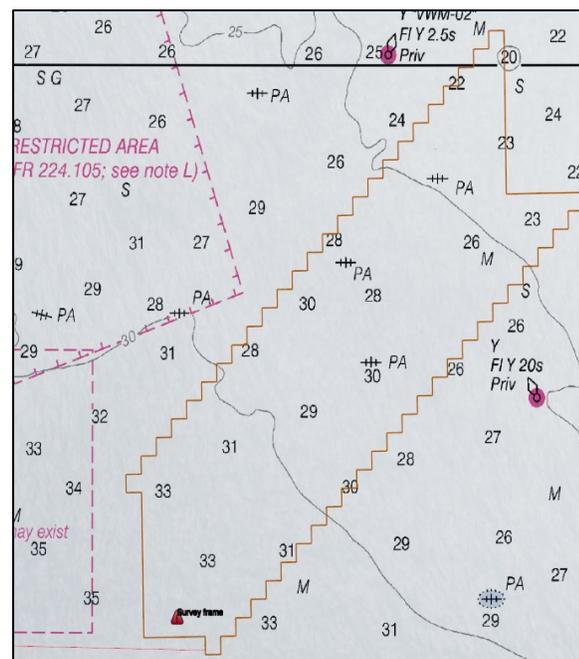

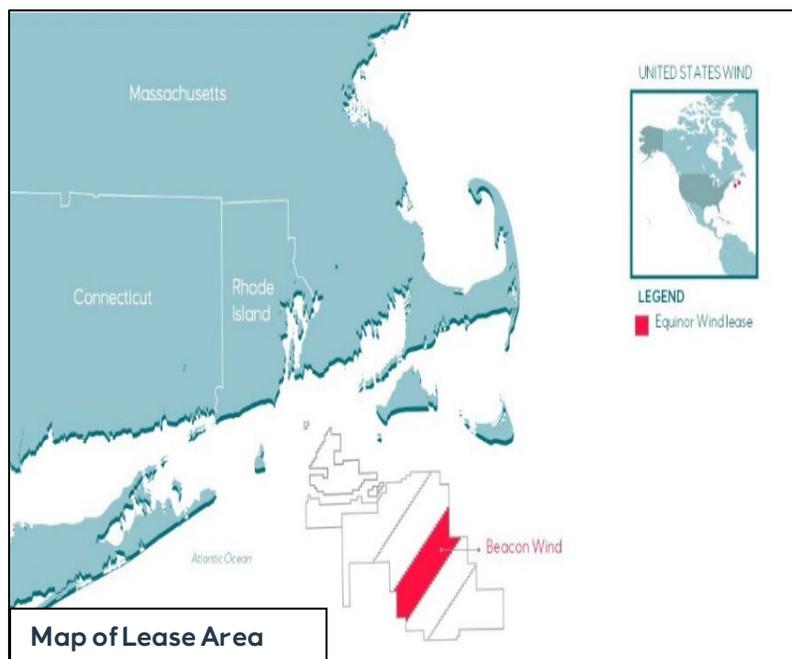

- ▶ Located in the Beacon Wind lease area
- ▶ The seabed frame is 2.1 x 2.1 x 2.5 m in size
- ▶ Weight: 22 metric tons
- ▶ Salvage operations currently underway
- ▶ Coordinates: 40° 40' 01.412" N (40.667059) – 70° 40' 21.624" W (-70.667190)
