

Recent News & Updates

Hello Elizabeth,

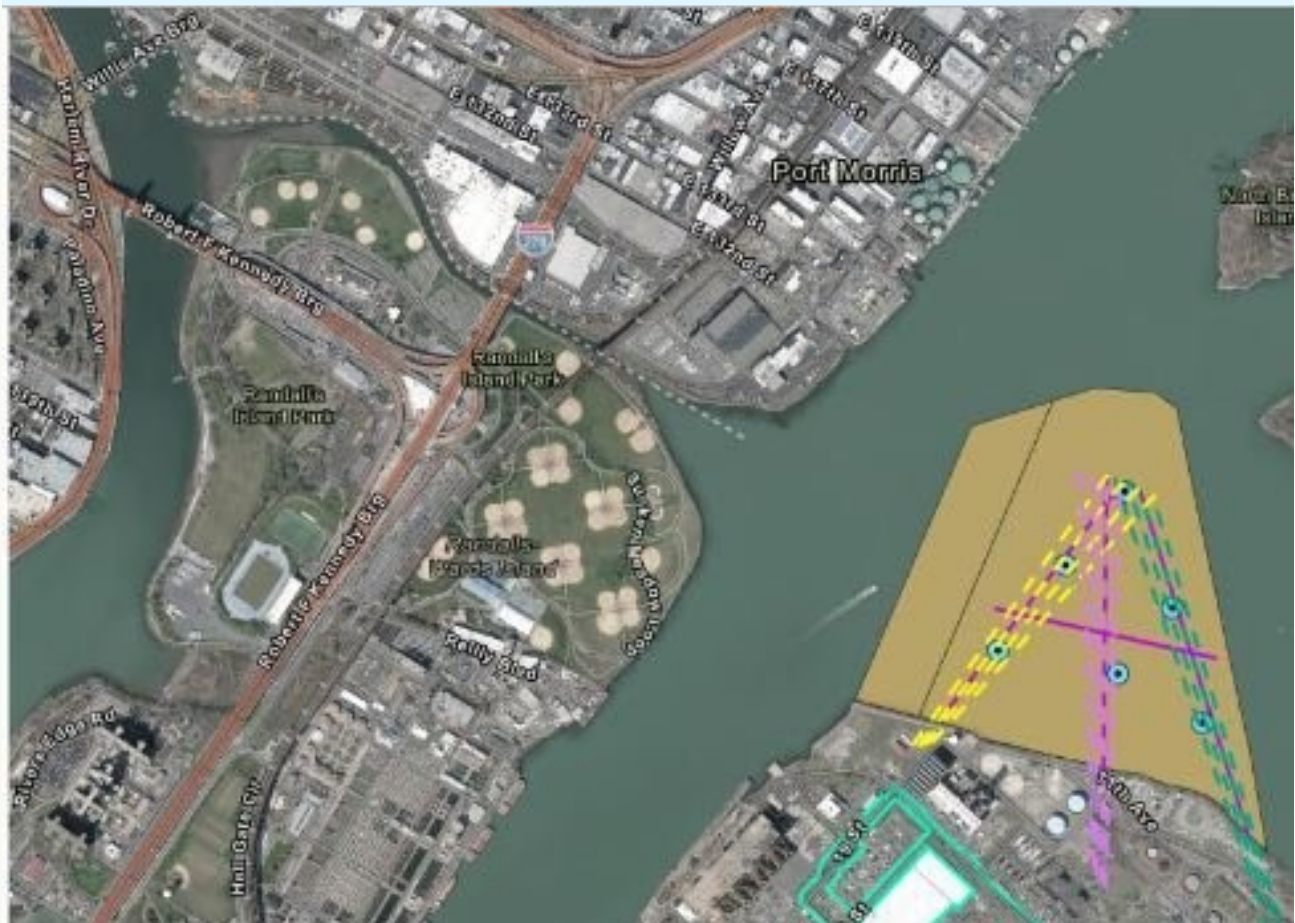

Equinor Wind US has contracted with Mott MacDonald and ADT to perform marine geotechnical surveys within the NY-East River to continue site assessments for six inshore borings to be completed. The boreholes are in water depths less than 20 ft. Equipment on scene will be a spud barge via Millers Launch and a shallow draft tug and crew vessel. Survey vessels will be monitoring VHF-FM CH 13, 14 and 16.

Survey crews are anticipated to work during 12-hour work shifts Monday-Sunday December 2, 2022 with completion of survey activities December 14, 2022.

NEW YORK

NY-EAST RIVER-LAWRENCE PT-SOUTH BROTHER ISLAND

Aquifer Drilling and Testing Inc. will be conducting geotechnical surveys north of Brother Island, in the East River, from **November 30 to December 23, 2022**, between scene will be a spud barge, via Millers Launch, 30'X90', shallow draft tug and crew and 16, for all concerned traffic. The tug/ barge will need a slow bell and minimum positioning. VTS will be notified of exact dates and timeframes for positioning and clearer.
